HEAD SPLITTER FOR BEEF ELECTRICAL-HYDRAULIC

Description:

Adjustable piston stroke machine, according to the size of the heads.

It is operated by 2 electric push-buttons at 24V, automatically returning to its position, while these push-buttons are not operated, the hydraulic circuit is without pressure, thus saving a lot of energy

Data Sheet:

- Manufactured in stainless steel. AISI-304
- Oil tank 25 Liters
- 3 HP engine. 220/380 VZ MHZ three-phase
- Electrical operation 24 V Hermetic
- Cutting time: 3 seconds
- Approximate production: 180 heads / hour.
- Guarantees obtaining the entire brain
- Cutting blade in special stainless steel

[VIDEO, How to use](#)

HEAD GUILLOTINE PIG ELECTRIC-HYDRAULIC

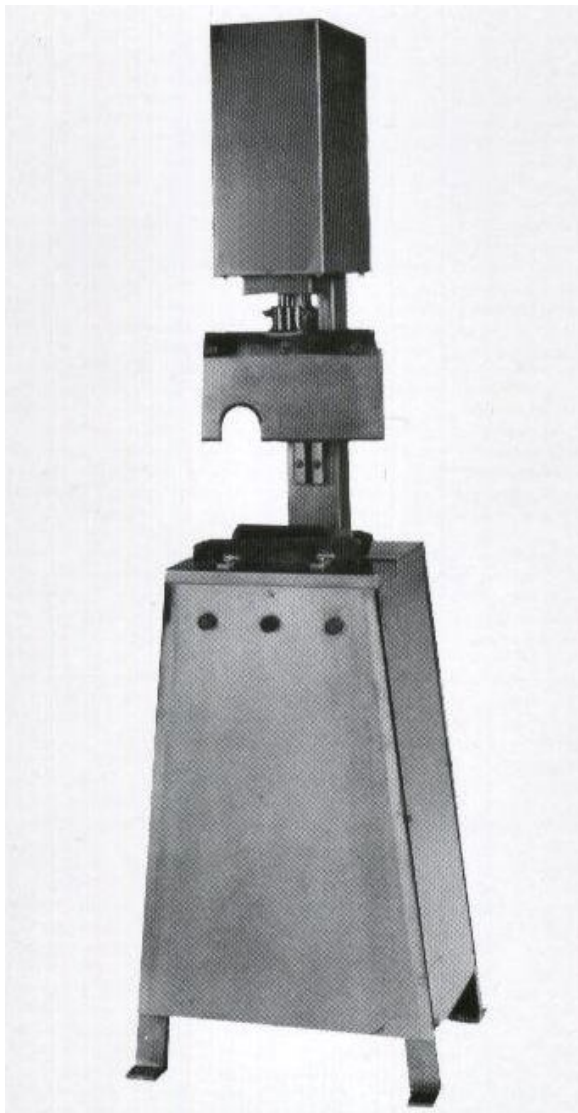

Description:

Adjustable piston stroke machine according to the size of the heads.

It is powered by 2 electrical switches to 24V back to its position automatically, while these buttons are not actuate the hydraulic circuit is depressurised thus saving a lot of energy.

Datos tecnicos:

- Coated stainless steel.
- Oil tank 25 liters
- Motor 2 CV. VZ 220/380 MHZ phase
- 24 V electric Maneuver Hermetic
- Cutting time 3 seconds
- Ensures obtaining the whole brain.
- Blade in stainless steel. Special

SHEEP HEAD GUILLOTINE ELECTRIC-HYDRAULIC

Description:

Adjustable piston stroke machine according to the size of the heads.

It is powered by 2 electrical switches to 24V back to its position automatically, while these buttons are not actuate the hydraulic circuit is depressurised thus saving a lot of energy.

Technical data:

- Coated stainless steel.
- Oil tank 25 liters
- Motor 2 CV. VZ 220/380 MHZ phase
- 24 V electric Maneuver Hermetic
- Cutting time 3 seconds
- Ensures obtaining the whole brain.
- Blade in stainless steel. Special
